

Vittles

Working Prototype Known Problems Report

List of functions not working correctly:

-Splash screen off center when starting up/opening the application; Possible actions for removal may be adding gravity to center the mp4 on the activity_splash.xml code

- Group sessions

-User login data storage:

-Swipe functionality

-Tensorflow implementation

-Firebase components unable to pass authorization and authentication, taken out of code; Possible solutions would be more time to work through the obstacles

List of suggested test cases/user stories:

-Test case for splash screen: check for code which causes borders of image to go out of bounds of device screen
