

Vittles

Installation Guide/User Manual

Installation:

Users may download Vittles from the Google Play Store on their designated Android device.

User Manual:

Login: Existing users may login by entering their login information. New users may choose to create an account,

Application use: Users may search for a food category they are interested in seeing restaurants for. To add desired choices to the list of interested locations, they should press the “Fork Yeah” button and if disinterested they should press the “Ew” button. From there a list of approved locations is then randomized and the user will be able to choose their desired restaurant. Simply return to the search query in order to begin a new search.
